

Global Reef Fish Pack (24 Animated Species)

Update v2.1.0

Content & Source Files Expansion (Mandarinfish, Moorish Idol fish)

The **Mandarinfish** and **Moorish Idol fish** have been completely overhauled and now features **high-quality animations** (instead of just one).

Included Source Files (Rig + Animations):

Location: `Assets/Mikhail Nesterov/Global Reef Fish Pack/SourceFiles/`

- **GlobalReefFish24_Maya_Source.zip** – Original Maya (.ma) production project.
- **GlobalReefFish24_Blender_Source.zip** – Complete Blender (.blend) project.

Update Log: Version 2.0 (The Professional Grade Update)

- New Species Added: **Mandarinfish**
- New Species Added: **Moorish Idol fish**
- **Source Files Included:** Added original **.ma (Maya)** and **.blend (Blender)**
- **Full Control:** Source files include the complete skeletal rig and all animation clips
- **Animation Expansion:** Mandarinfish comes with a full set of 7 animations
- **Animation Expansion:** Moorish Idol comes with a full set of 10 animations
- **Optimization:** Updated PBR materials for better performance in Unity (Built-in & URP).

Folder Structure

To keep your project clean, the asset is organized as follows:

- **Animations/** – animation clips.
- **Models/** – The optimized FBX mesh.
- **Prefabs/** – Ready-to-use fish prefabs.
- **Textures/** – PBR texture maps (Albedo, Normal, Metallic/Smoothness).
- **SourceFiles/** – Contains external project files (Maya & Blender).
