

# Mandarinfish

## 1. Overview

This package contains a high-quality, animated **Moorish Idol** (*Heniochus acuminatus*). It is optimized for real-time performance in Unity, featuring a professional rig and 10 essential animations for realistic underwater behavior.

## 2. Folder Structure

To keep your project clean, the asset is organized as follows:

- **Animations/** – Contains 7 animation clips (AC\_fish22\_Mandarinfish\_Idle, etc.).
- **Models/** – The optimized FBX mesh.
- **Prefabs/** – Ready-to-use fish prefabs.
- **Textures/** – 2K PBR texture maps (Albedo, Normal, Metallic/Smoothness).
- **SourceFiles/** – Contains external project files (Maya & Blender).

## 3. External Source Files

As a bonus, this asset includes the original production files for further customization. These files contain the full skeletal rig and animation layers.

**Location:** `Assets/Mikhail Nesterov/Global Reef Fish Pack/SourceFiles/`

**Included Archives:**

- **GlobalReefFish24\_Maya\_Source.zip** – Original Maya (.ma) production project.
- **GlobalReefFish24\_Blender\_Source.zip** – Complete Blender (.blend) project.

**Note:** These are ZIP archives to comply with Store requirements and optimize project size. Please extract them to an external folder if you wish to modify the 3D source.

## 4. Animation List

1. **Idle** (Subtle fin movement)
2. **Swim** (Standard loop)
3. **Turn Left**
4. **Turn Right**
5. **Eat Ground**
6. **Eat Swim**
7. **Died**

## 5. Technical Specifications

**Render pipeline:** Built-in, URP

**Number of textures:** 3

**Texture dimensions:** 2048 x 2048 px

**Vertices count of Moorish Idol:** 1588

**Number of meshes/prefabs:** 1

**Rigging:** Yes

**Animation count:** 10

**UV mapping:** Yes
