

Angelfish Collection Pack 10

The **Angelfish Collection Pack** — a definitive set of the most iconic and beautiful reef dwellers. This pack is designed for developers who demand both visual excellence and technical flexibility. Every fish in this collection has been meticulously crafted to represent its real-world counterpart in both appearance and scale.

Main Features:

- **10 Unique Species:** A diverse range of Angelfish with accurate PBR textures.
- **Master Animation Library:** Every single fish comes with **22 animation clips**
- **Real-World Scale:** All models are scaled to their natural biological sizes for effortless integration.
- **Game-Ready Optimization:** Clean topology, suitable for PC, Console, and Mobile/VR.
- **Source Files Included:** Full access to original **Blender** and **Maya** files for custom rigging or animation tweaks.
